The Topper

Great Choice!

From everyone here at Panda, we would like to thank you for your recent purchase!

The Topper by Panda is an extremely effective way to help relieve neck and back pain. The memory foam is designed to be body-heat sensitive which helps the mattress to comfortably cradle your entire body whilst you're sleeping.

The Panda Topper is designed completely with comfort in mind. Made up of three 3rd generation memory foam layers, each layer having different density and thickness, allowing the mattress to breath and easily mould to your body shape. The density and layer thickness of the memory foam mattress is a very different experience compared to other types of mattress toppers. This is because The Panda Topper moulds to your body, relieving pressure points and preventing bed sores.

For the ultimate Panda Life sleeping experience, we advise using a Panda Memory Foam Bamboo Pillow alongside our 100% Bamboo Panda Bed Set.

Recycling

All of our packaging is made from 100% recycled kraft paper. Kraft paper is a 100% biodegradable natural product. The pulp is made from long virgin fibres of maritime pine which is not bleached, therefore there is minimal chemical processing. This method is what gives the paper it's unique colour retaining the natural wood texture.

Just like leaves from trees, kraft paper is naturally biodegradable. Within a few weeks the paper decomposes, naturally returning to it's normal form of cellulose fibres, which can be fully assimilated back into it's natural environment with no impact on the surrounding wildlife!

Care & Instructions

5

1. Carefully remove The Topper from the kraft paper packaging. Once removed, using a pair of scissors cautiously cut the plastic cover and pull the mattress out. Be vigilant ensuring that you do not cut the memory foam or the anti-slip straps.
2. Place the mattress on top of your bed while it is still rolled up.
3. Dispose of the plastic cover and roll-out the mattress onto your bed.
4. The mattress will start to expand, give your mattress 12-16 hours to allow the memory foam to fully expand.

Brand new memory foam has a unique smell. Do not be alarmed, the odor is completely normal and harmless. It will disappear within 2-3 days.

The Topper

Washing Instructions

Your Panda Bamboo Mattress Cover is machine washable, we recommend that the cover is laundered at 30 degrees in a large capacity machine. The Panda Bamboo Cover is extremely easy to clean in a washing machine or by hand.

The memory foam itself, should be simply wiped clean with a damp cloth. If you wish to deep clean The Topper, we would suggest using a household water steamer. That way you are cleaning The Topper without using any harmful chemicals for you or the environment.

Claim Your 10 Year Guarantee
